BRIEF INFORMATION ABOUT THE FUND

UNITED ASIAN HIGH YIELD FUND (the “Fund”) seeks to provide investors with income and capital appreciation by investing in the United Asian High Yield Bond Fund (the “Target Fund”) which has an investment focus on high yield fixed income securities.

The Fund is a wholesale fund managed by **UOB Asset Management (Malaysia) Berhad** (the “Manager”) and the Fund is not a capital protected fund nor a capital guaranteed fund.

THE TARGET FUND’S INFORMATION

The Target Fund was established on April 2013 as one of the series under the umbrella of the United Choice Portfolios. The base currency of the Target Fund is SGD. The regulatory authority which regulates the Target Fund is the Monetary Authority of Singapore. The Target Fund seeks to achieve a total return consisting of income and capital appreciation by investing primarily (i.e. at least 50% of the Target Fund’s investable amount) in high yield fixed income securities (including money market instruments) issued by Asian corporations, financial institutions, governments and their agencies. The Target Fund is managed by UOB Asset Management Ltd, Singapore.

PRODUCT SUITABILITY

KEY RISKS ASSOCIATED WITH THE FUND

Please be advised that if the Sophisticated Investor invests in units through an institutional unit trust adviser ("IUTA") which adopts the nominee system of ownership, the Sophisticated Investor would not be considered to be a Unit Holder under the Deed as the Sophisticated Investor's name will not appear in the register of Unit Holders. The Sophisticated Investor may consequently not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holders' meeting and to vote thereat).

Risk of Passive Strategy	The Fund adopts a passive strategy of investing a minimum of 90% of its NAV into the Target Fund at all times. This passive strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's NAV declines. All investment decisions on the Target Fund are left with the Target Fund's fund manager.
Risk of Not Meeting the Fund's Investment Objective	This is the risk that the Fund may deviate from the intended investment objective and hold 100% of the Fund's NAV in cash in order to protect the Unit Holders' interest.
Currency Risk	This risk is associated with investments denominated in currencies different from the base currency of the Fund. When foreign currencies move unfavourably against the MYR, these investments may face currency loss in addition to any capital gains or losses, which will affect the NAV of the Fund, and consequently the NAV per Unit of the Fund.

KEY RISKS ASSOCIATED WITH THE TARGET FUND

Foreign exchange and currency risk	The Target Fund which is denominated in SGD may have exposure, either directly or indirectly, to a wide range of currencies.
Political risk	The investments of the Target Fund may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls which may be imposed by the

	relevant authorities in the other countries.
Derivatives risk	Investments in financial derivative instruments may require the deposit of initial margin and additional deposit of margin on short notice if the market moves against the investment positions. If no provision is made for the required margin within the prescribed time, the Target Fund's investments may be liquidated at a loss.
Liquidity risk	The Target Fund will be exposed to liquidity risk when the Target Fund is invested in Asian and/or emerging markets, where the Target Fund may face difficulty in unwinding its position in these markets which results in insufficient cash to meet redemption requirements.
Fixed income securities risk	Investments in fixed income securities are subject to interest rate fluctuations and credit risks, such as risk of default by issuers.
Counterparty risk	Where the Target Fund enters into over-the-counter transactions, the Target Fund is exposed to the risk that a counterparty may default on its obligations to perform under the relevant contract.
Broker risk	In the event that one of the brokers or dealers were to fail or become insolvent, there is a risk that the Target Fund's orders may not be transmitted or executed and its outstanding trades made through the broker or dealer may not settle.
Risk of use of rating agencies and other third parties	Credit ratings of instruments invested into by the Target Fund represents the investment manager of the Target Fund's and/or rating agencies' opinion regarding the credit quality of the instruments or the issuers and are not a guarantee of quality.
Securities lending and repurchase transactions risk	Securities lending generally involves the risk that the borrower may fail to return the securities in a timely manner or at all. As for repurchase transactions, if the other party to a repurchase agreement defaults on its obligation under the agreement, the Target Fund may suffer delays and incur costs or lose money in exercising its rights under the agreement.

Note: The abovementioned risks which investors should consider before investing into the Fund should not be considered to be an exhaustive list. Sophisticated Investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Sophisticated Investors are advised to consult their professional adviser before investing. Please refer to the Replacement Information Memorandum under "Risk Factors" for further details on risks.
