KEY RISKS ASSOCIATED WITH THE FUND

Please be advised that if the Sophisticated Investor invests in units through an institutional unit trust adviser ("IUTA") which adopts the nominee system of ownership, the Sophisticated Investor would not be considered to be a unit holder under the Deed as the Sophisticated Investor's name will not appear in the register of unit holders. The Sophisticated Investor may consequently not have all the rights ordinarily exercisable by a unit holder (for example, the right to call for a unit holders' meeting and to vote thereat).

Risk of Passive Strategy	The Fund adopts a passive strategy of investing a minimum of 90% of its NAV into the Target Fund at all times. This passive strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's NAV declines. All investment decisions on the Target Fund are left with the Target Fund's fund manager.
Currency Risk	This risk is associated with investments denominated in currencies different from the base currency of the Fund. When foreign currencies move unfavourably against the MYR, these investments may face currency loss in addition to any capital gains or losses, which will affect the NAV of the Fund, and consequently the NAV per unit of the Fund.

KEY RISKS ASSOCIATED WITH THE TARGET FUND

Equity risk	The Target Fund invests in equities and equity-related securities which are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities.
Concentration risk	Concentration of investments in a relatively small number of securities, sectors or industries, or geographical regions may significantly affect performance of the Target Fund.
Foreign exchange and currency risk	The Target Fund which is denominated in SGD may have exposure, either directly or indirectly, to a wide range of currencies.
Foreign market risks (includes emerging markets)	These risks may include changes in currency exchange rates; less-liquid markets and less available information; less government supervision of exchanges, brokers, and issuers; increased social, economic, and political uncertainty; and greater price volatility.
Political, regulatory and legal risk	The value and price of the Target Fund's investments may be adversely affected by international political developments, changes in exchange controls, taxation policies, monetary and fiscal policies, and etc.
Small and medium capitalisation companies risk	Investments in small and medium capitalisation companies generally carry greater risk than is customarily associated with larger capitalisation companies, which may include, less public information, greater volatility, higher risk of failure than larger companies and less liquidity.

Derivatives risk	Investments in financial derivative instruments may require the deposit of initial margin and additional deposit of margin on short notice if the market moves against the investment positions. If no provision is made for the required margin within the prescribed time, the Target Fund's investments may be liquidated at a loss.
Counterparty risks	Where the Target Fund enters into over-the-counter transactions, the Target Fund is exposed to the risk that a counterparty may default on its obligations to perform under the relevant contract.
Exceptional market conditions	Under certain market conditions, it may be difficult or impossible to liquidate or rebalance positions.
Liquidity risk of investments	The Target Fund will be exposed to liquidity risk when the Target Fund is invested in Asian and/or emerging markets, where the Target Fund may face difficulty in unwinding its position in these markets which results in insufficient cash to meet redemption requirements.
Broker risk	In the event that one of the brokers or dealers were to fail or become insolvent, there is a risk that the Target Fund's orders may not be transmitted or executed and its outstanding trades made through the broker or dealer may not settle.
Emerging markets risk	Investments by the Target Fund in emerging markets may involve a high degree of risk and may be considered speculative.
Convertible securities risk	Generally, the market value of convertible securities tends to decline as interest rates rise. Because of the conversion feature, the market value of convertible securities also tends to vary with fluctuations in the market value of the underlying shares.
Real estate securities risk	Risks associated with investing in the securities of companies principally engaged in the real estate industry such as Real Estate Investment Trust ("REIT") securities.

Note: The abovementioned risks which investors should consider before investing into the Fund should not be considered to be an exhaustive list. Sophisticated Investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Sophisticated Investors are advised to consult their professional adviser before investing. Please refer to the Replacement Information Memorandum under "Risk Factors" for further details on risks.
